

# MYWAVE.ai

Fuel workforce productivity  
and the SAP Business One  
experience with an AI-  
powered productivity tool.

# Better Together

SAP Business One users can now harness the power of AI and automation to drive unprecedented productivity. MyWave uses historical data, user intent, and context to recognize patterns and fine-tune your business processes over time. Workflows, called Waves, combine natural language prompts and automation to guide users through tasks and processes.

- ✓ **Leverage automation.**  
Extend SAP Business One's functionality with guided workflows and automation.
- ✓ **Get more done.**  
Reduce processing steps and time with natural language prompts that intuitively guide users through daily processes.
- ✓ **Cost-effective innovation.**  
Focus on growth, productivity, and innovation while reducing operating costs.

- ✓ **Improve usability.**  
Simplify how users interact with SAP Business One and its data by delivering data access and entry within a guided workflow.
- ✓ **Execute multi-system processes.**  
Seamless API connectivity empowers users to execute processes across, and interact with, multiple systems.

# Value unlocked

Drive new levels of operational efficiency while freeing up resources for more strategic activities.

**10X**  
**Increase in productivity**

**80%**

**Reduction in errors and manual work**

Streamline processes and improve your data's value and quality with automation and guided workflows.

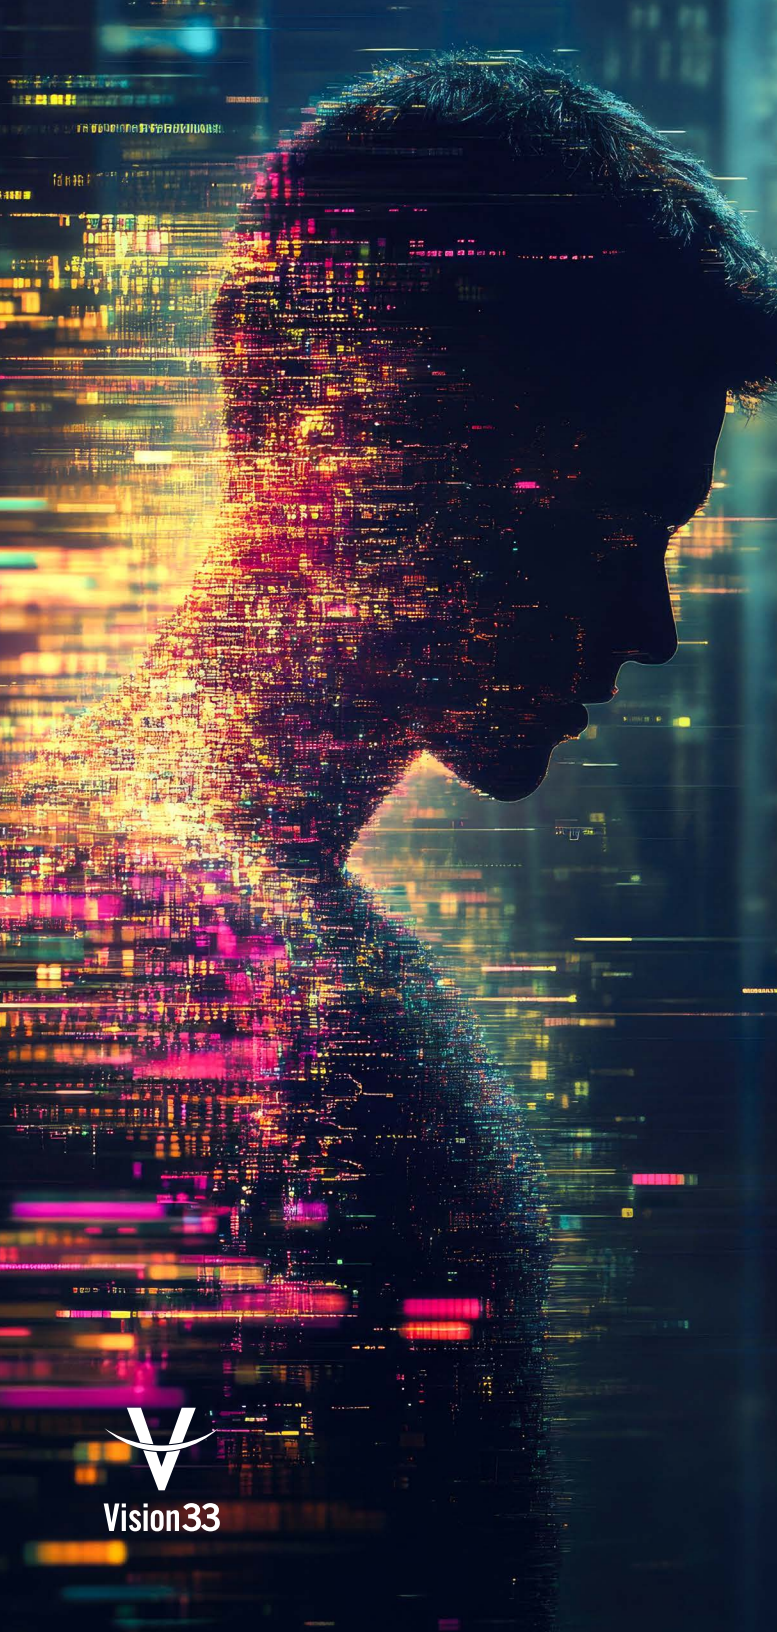

Eliminate lengthy development cycles and achieve ROI faster than with other approaches.

**75%**

**Faster to deploy and achieve ROI**

# MyWave.ai: An Intelligent Co-Worker

MyWave's brain consists of agentic AI and large language models (LLMs).

**Agentic AI** acts as an autonomous agent, making decisions and taking actions to achieve specific goals. It learns from its successes, failures, and end-user behaviors and patterns, helping it adapt and learn over time. The more MyWave is used, the smarter it gets, helping end-users achieve their goals more efficiently.

**Large language models (LLMs)** help MyWave accurately understand and process user intent, including from PDFs and documents, ensuring consistent performance across diverse inputs and contexts.

And because Waves are reusable domain models, they can be extended and applied to other systems and processes.

## Traditional Automation Vs. MyWave.ai

Automation is an essential driver for workforce productivity. Typically triggered by rule-based events or schedules, this powerful tool runs silently in the background.

MyWave requires human engagement, often resembling an intelligent, automated Q&A exchange until the task or process is complete.

# Jump in with starter waves

The MyWave Starter Pack is an affordable suite of out-of-the-box Waves, each designed to accelerate a common business task. Buy them as a pack or pick your three favorites.

## REPORT MY EXPENSES

**Record expenses with ease:** Streamline expense recording by chatting your way through uploading and entering receipts. OCR scans and captures receipt images, enters expense details into SAP Business One, and creates an A/P invoice.

## UPDATE MANUFACTURER CODE

**Manage manufacturer codes effortlessly:** Update item manufacturing codes within SAP Business One via a user-friendly interface.

## CREATE AN A/R INVOICE

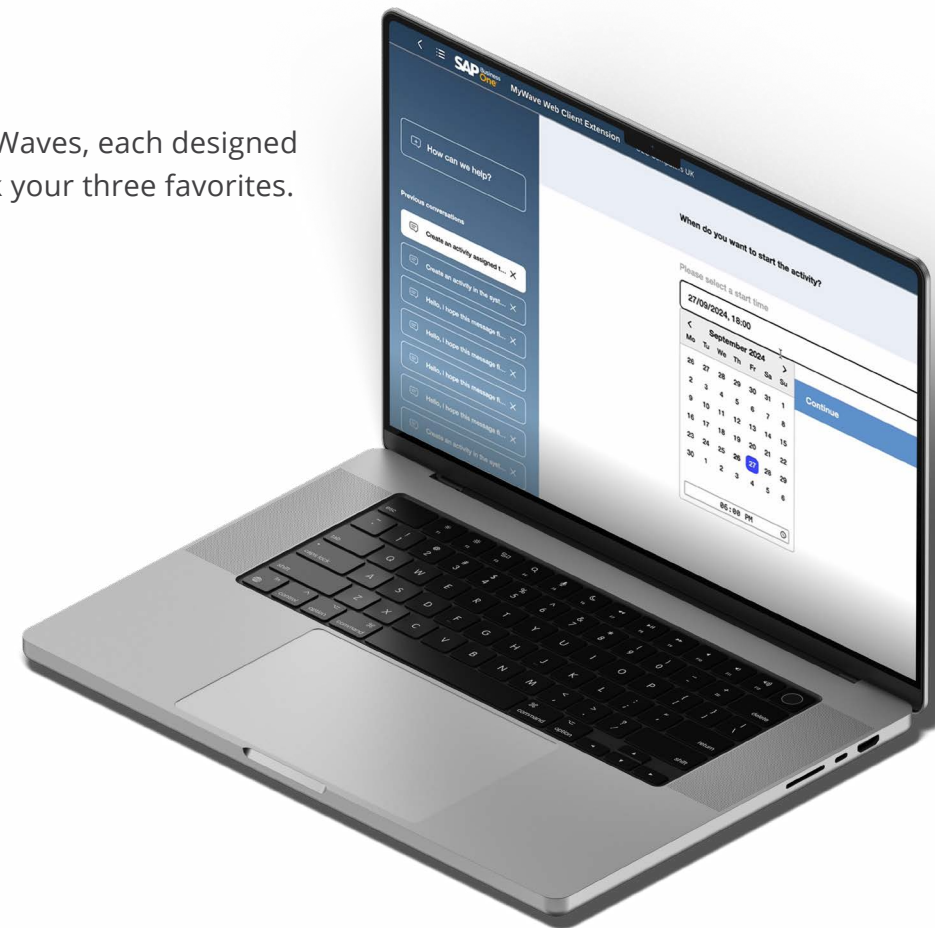

**Quickly create A/R invoices:** Accelerate invoice creation by automating the invoice creation process. Apply discounts, consolidate deliveries per business rules, and post invoices or save them as drafts.

## CREATE AN ACTIVITY

**Boost activity management:** Eliminate manual scheduling by automatically creating and scheduling SAP Business One activities based on your input.

## CREATE A SERVICE CALL

**Manage service calls effortlessly:** Use natural language prompts to create and manage service calls from MyWave's user-friendly interface, seamlessly syncing bidirectionally with SAP Business One.

## SET ITEM MASTER DATA TO INACTIVE

**Deactivate item master:** Update item master data status to "Inactive" to prevent using discontinued or obsolete items.

## PROCESS AN APPROVAL

**Accelerate approval workflows:** Speed up decision-making with the automated submission, tracking, and processing of approval requests, such as expenses or purchase requisitions.

# Custom Waves

No two businesses are alike, nor are their processes. Custom Waves are an affordable way to streamline redundant, repetitive, or complex tasks and processes. They use natural language prompts to string disconnected steps together, close process gaps, and eliminate errors and missed steps. Plus, MyWave's no-code interface makes process changes fast and easy, eliminating the cost of expensive, time-consuming development.

# Key Features

**Voice-to-text enabled:** Waves can be voice-to-text enabled, making it easier to perform tasks while on the go

**GenAI:** Accelerate task completion by up to 10x

**Large Language Models (LLMs):** Accurately understand and process user intent from diverse inputs and contexts

**Natural language prompts:** Engage users with easy-to-use natural language prompts until the task is complete

**InfoPlugins:** Facilitate seamless integration and data orchestration with third-party platforms

**Web Client:** Manage your business from anywhere, anytime

## Why Vision33

At Vision33, we're forward-thinkers. We combine best-in-class cloud technology with the industry's most experienced people to deliver ERP and business solutions that create transformative results.

Because helping our customers be more productive is in our DNA, we're proud to partner with MyWave.ai, a cutting-edge AI productivity tool. Supported by Vision33's deep technical expertise and decades of experience, the MyWave partnership is a rich addition to our legacy: delivering solutions that drive quantifiable efficiency gains.
